Founder Chairman, M S Swaminathan Research Foundation

MSS/DB/
10 July 2014

MESSAGE

Biodiversity is the feedstock for the biotechnology and plant, animal and fish breeding enterprises. Biohappiness comes from the sustainable and equitable use of Biodiversity for creating more jobs and income on a sustainable basis. Unfortunately, due to genetic erosion many biodiversity rich areas are becoming hotspots. I hope the congress will show the way to converting biodiversity hotspots into happy spots. I wish the congress and GSRF great success.

M S Swaminathan
